Description

The Serien Lighting Curling Ceiling LED is a ceiling light with opal lampshade. It was designed by the two founders of the German manufacturer Serien Lighting, Jean-Marc da Costa and Manfred Wolf. The light is emitted from the lamp directly downwards as well as scattered all around into the room.

Various sizes and colour temperatures are available for the ceiling light. The small version with 11 watt LED can be dimmed by a phase section dimmer. The medium version has a 13 watt LED, which can also be dimmed with a phase dimmer. On request, there are also offered two additional medium versions. One version is DALI and the other is dimmable with 1-10V. Both optional versions require a 5-core power supply. The available colour temperatures are 2,700 Kelvin extra warm white and 3,000 Kelvin warm white.
