

IP44.DE

Lumen Down

Technical details

Country of Manufacture	 Germany
Manufacturer	IP44.DE
Designer	Kressel & Schelle
protection	IP55
Scope of delivery	LED
Depth in cm	11
material	stainless Steel
surface	stainless Steel
dimming	on site dimmable with a trailing edge dimmer
Wattage	10 W
LED	inclusive
Luminous flux in lm	190
Color temperature in Kelvin	3,000 warm white
technology	Ivylight
light distribution	directly
Dimensions	H 5 cm L 22 cm

Description

The IP44.de Lumen Down is a wall lamp of cuboid form. In contrast to the Lumen, it emits the light only in one direction, and this can be down- or uplight. It was created by the design team Kressel & Schelle.

The diffuser is made of opal toughened glass. Fitted is the light with the specially developed by IP44.de IvyLight LED technology. So more light efficiency is produced with less power consumption. In addition, the IvyLight LEDs were optimized so that they are more durable than other LEDs.

With a protection class of IP55, the Lumen Down is protected against splashing water and dust.
