### Description

The Foscarini Big Bang L LED is the medium-sized pendant light of this collection. It consists of superimposed methacrylate plates, which seem to be randomly arranged. The arrangement of the plates creates interesting light and shadow games.

The LED lamp is available in two colours: red and white. It can be dimmed on site. The light is emitted glare-free into the room. Enrico Franzolini and Vicente Garcia Jimenez designed this pendant lamp in 2016 according to the already known, smaller halogen light of this series. The cable with a length of 450 cm can be shortened if necessary.
