| LED | inclusive |
| bulb exchange | on site itself |
| Dimensions | H 60 cm B 31 cm |

Description

The Secto 4230 is a wall lamp by Secto Design. The lamp shade is made of wood and makes the light pleasantly transparent. The openings are of different sizes and the light is distributed upwards and downwards. The lamp can be mounted with the large opening facing downwards or upwards. Depending on the mounting, more light is then emitted in the corresponding direction. The lamp shade is available in the surfaces white laminated, black laminated, walnut veneer and natural birch. The Secto Design Secto 4230 is offered with a plug lead and a direct wall mounting. The version with the plug lead has a white cable and a cord switch on the supply line. It is operated with an LED retrofit with a maximum power of 20 watts for an E14 socket.
