Description

The Vibia North 5625 floor lamp has four lamp arms, each with a lamp shade. The lamp arms are of different lengths and extended in different directions. The design of the North collection by Arik Levy is very innovative, dynamic and flexible. The height of the lamp shades can be precisely adjusted during installation to direct the light where it is needed. Even after installation, the height of the lamp shades can be modified if necessary. The North 5625 is available in the following surfaces: white, black, beige and blue. All surfaces are matt lacquered. The lamp can be mounted with or without plug. A dimmer is integrated in the centre of the base.
