

Vibia

Guise 2260

Technical details

Country of Manufacture Spain
Manufacturer Vibia

Designer Stefan Diez

Year of design 2018
protection IP20
Scope of delivery LED
Depth in cm 3
Diameter in cm 54

material aluminum, borosilicate

cable length 300 cm

dimming sensor dimmer

Wattage 10 W
LED inclusive
Colour Rendering Index >90
Luminous flux in Im 445

Color temperature in Kelvin 3,000 warm white

Dimensions Ø 54 cm

Description

With the Vibia Guise, Stefan Diez has discovered a new potential use for LED technology in contact with matter: The light emanates from the piece of glass, while the source remains invisible. With this approach Guise achieves a magical effect and at the same time is fully functional. Because of the transparency of the glass when switched off, the lamp almost disappears. When switched on, it expresses a luminous and almost magnetic presence.

The wall lamp version with a different formal expression features a glass disc that gives off a perimeter glow where the LED light source is also hidden. When turned off, it becomes fused with its background, when on, it evokes a solar eclipse. Vibia presents a wall lamp that integrates the LED light with the glass and making it pass through in such a way that it becomes invisible and then allowing it to appear out of nowhere. The Guise 2660 has a diameter of 54 cm.
