### Description

The Vibia Guise 2270 is a pendant lamp with a vertical glass. With the Guise 2270, Vibia presents a pendant lamp with an invisible light source in which the LED light seems to emanate directly from the material. The light is dimmed and switched by an optical sensor. The cable can be shortened if required. On request, this pendant lamp is also available as a DALI dimmable version or as a version which is dimmable with a Casambi module via smartphone. With a Casambi module, it is possible to operate the lamp via smartphone or tablet using the Casambi app via Bluetooth. Casambi technology also offers the option of switching the light on at specific times via a timer. A lamp with a special cable length is also available on request.
