Description

The Serien Lighting Curling Ceiling Acryl clear / conical opal S directs its light both directly downwards and softly diffused all around. The ceiling light has a diameter of 16 cm and is 9 cm high.

This Curling Ceiling acrylic lamp is available with a colour temperature of 2,700 Kelvin extra warm white, 3,000 Kelvin warm white or with dim to warm function. With the dim to warm function, the dimming behaviour of classic incandescent lamps, which is perceived as pleasant, is imitated during dimming. In this way, when dimmed down, the light becomes darker and even changes its colour temperature. The colour temperature changes from 1,800 Kelvin extra warm white to 3,000 Kelvin warm white. In addition to this ceiling lamp, the Curling Ceiling Acryl clear / conical opal M with a diameter of 22 cm is also available from the lamp family.
