### Description

The light is emitted by the Serien Lighting Curling Ceiling Acryl clear / cylindrical opal M directly downwards and softly diffused all around. This lamp is available in three versions: with a colour temperature of 2,700 Kelvin extra warm white, 3,000 Kelvin warm white or with dim to warm function. The lamp with dim to warm function imitates the pleasant dimming behaviour of classic incandescent lamps. When dimmed down, the light becomes darker and also changes its colour temperature. The colour temperature changes from 1,800 Kelvin extra warm white to 3,000 Kelvin warm white.

The Curling Ceiling Acryl clear / cylindrical opal M has a diameter of 22 cm and is 11 cm high. A smaller ceiling lamp with a shade diameter of 16 cm is also available from the series.
