Description

The Foscarini Gioia Grande is a wall lamp with a diameter of 68 cm. In the centre of a transparent element made of polymethyl methacrylate is positioned an irregular element of white marble. Both elements are freely movable in front of an LED light source mounted on the wall. The light is emitted by the LED through the transparent element into the room, creating a halo effect around the lamp on the wall. The Gioia Grande is intended to symbolize the encounter between two worlds: the world of the past with its marble statues and the world of the present with its modern materials. The transparent element of Gioia Grande is available in blue, green and pink versions. The wall lamp has a grey plug lead with an on/off switch. For wall mounting on the direct power connection, the plug lead can be removed if necessary. The lamp is dimmable on site with a trailing edge phase dimmer. In addition to this wall light, the smaller Gioia with a diameter of 40 cm is also included in the light series.
