Description

The eNormaJeane double 160 by Lichtlauf floats above the table like a dress in the wind above an underground shaft and emits powerful, soft light downwards and between the two layers of the lampshade, which is shaped into a volume, also reflected into the room. Between the two layers of the lampshade, an intense glow is created by multiple reflection. Copper, the colour contrast between the inside and outside creates the tension. Each lamp, individually shaped by hand, is unique. The eNormaJeane double 160 by Lichtlauf is used wherever larger, long tables are to be complemented with a light sculpture. The lampshade made of two layers of aluminium is available in brown-black or white on the outer sides. The inner sides of the lampshade are hand-applied with copper leaf metal or in white. The three integrated LEDs, each with an output of 12 watts, have a colour temperature of 3,000 Kelvin warm white. The light of the integrated LEDs of this dimmable lamp is characterised by a very good colour rendering with a high colour rendering index of Ra 90. The lampshade of the eNormaJeane double is 160 cm long, 30 cm wide and approx. 22 cm high. Due to the handcrafted manufacturing process, there may be irregularities in the leaf-finished surface. The total height of the lamp is max. 200 cm, the rectangular ceiling suspension is 110 cm long, 5 cm wide and 3 cm high. The height adjustment of the eNormaJeane double 160 is made directly on the three wire ropes with which the lamp is suspended from the ceiling. The eNormaJeane double 160 by Lichtlauf is also available with a 125 cm long lamp shade.
