

Anthologie Quartett

Jahreszeiten Eiszeit Ceiling Lamp

Durchmesser in cm

- 70
- 90

Oberfläche

- brown
- gold
- silver
- white

Technical details

Country of Manufacture	 Germany
Manufacturer	Anthologie Quartett
Designer	Michael Topor
Year of design	2003
Protection class / IP rating	IP20
Contents of the package	Leuchtmittel/Bulb
material	crystal glass, Iron
dimming	dimmable on site
Base / Socket	B15d
system performance	10 x 40 Watt (max.)

Description

The Anthologie Quartett Jahreszeiten Eiszeit ceiling lamp (Seasons Ice Age ceiling lamp) features large, hand-cut crystal glasses as a design element. The metal structure made of iron is available in bronze brown, gold, silver or white finishes. A chrome finish is also offered on request. The Jahreszeiten Eiszeit ceiling lamp is offered in two sizes: with a diameter of 70 cm or 90 cm. The diameter of the lamps is approx. 70 cm or 90 cm in each case. Depending on the size, the crystal glasses are distributed in different arrangements on the metal structure.

In the 18th century, the Montgolfier brothers caused a sensation with the first flight in a hot air balloon. This is how lamps with a semicircular shape in the lower segment were created at that time. The lamp series Jahreszeiten is inspired by this Montgolfier style, which gave the lamp its bulbous shape in its lower third. The symmetrical arrangement of the electric arms give the lamp a modern design language.

Note: The use of retrofit sockets (B15d) means that the light sources corresponding to the respective technical status can also be used in the future (halogen lamp, LED). In terms of sustainability, the lamp can continue to shine for many years to come.
