

GRUPA

Igram

2020.

Product Information

Silent by stature and nature, Igram is an interplay of ambiance and function. It is a new Grupa collection consisting of wall lamp and lamp table.

The mobility of the shades and the arms of the lamps enable the maximum flexibility in directing the light. Horizontal arm and both light sources can be rotated 180 degrees. There is a built-in button for dimming and on/off switch integrated on the top of the horizontal arm.

Like any other great combination, Igram lamp+table work perfectly together. It is a unique multipurpose product, combination of metal construction and different handcrafted tabletops in ceramic and wood.

Wall lamp has two integrated light sources. When facing the wall, the light only sketches the edges of the space it inhabits. Pointing towards the interior, it becomes even more functional.

Igram is made of handmade steel body and an aluminum shade with PMMA diffusor coated in deep matte black.

IGRAM LAMP + TABLE

Table top in wood

Ceramic glazed handmade top
