Descripción

The Vibia Origami 4500 is one of two one-light, square wall lights of this lighting collection. It differs from its sister model, the Origami 4501, only by the arrangement of its "folds", so a crease runs in this variant horizontally through the entire light. The name of the series comes from the fact that the lights are reminiscent of the Japanese art of paper. The diffuser is made of polycarbonate and available in the surfaces green, brown, terra dark and white.

The design was created by Ramón Esteve. The Origami 4500 is suitable with its IP65 protection class for both the exterior and the interior. As lamps a powerful LED with 6.3 watts is included. The lamp can be dimmed with a trailing edge phase dimmer. The wall lamp convinces already singly, but is even more effective in combination with other lights of this series.

To a wall terminal up to 30 modules can be connected. For larger compositions ask us for a special connection system. If you need help in configuring your personal Origami wall art combination, please contact us also.
