Profundidad en cm	12,5
material	acero inoxidable cepillado
Dimensions	H 43,5 cm B 36 cm

Descripción

The Glasnost stainless steel mailbox is one of Keilbach's design classics. It is produced in Germany completely from brushed stainless steel and has a width of 36 cm.

The design is rather simple and elegant. The letterbox is understood as an architectural element that does not want to be more important than the architecture itself.

Keilbach attaches great importance to high-quality materials, careful workmanship, timeless design and long life expectancy. This high-quality workmanship can be seen, for example, in the installation of 2 damping elements. Thus the flap closes slowly and quietly. The stainless steel is between 1.5 and 2 mm thick, the mailbox weighs 9 kg. The lock was placed under the access flap. The front is flush with the housing. Inside, the letters are elevated on a double floor.

Matching the letterboxes, Keilbach also offers tripods that carry the letterbox. You can find these tripods under accessories.

You can also find suitable newspaper boxes in our online shop.

You can order a foil inscription of your Glasnost letterbox, individual logos, displays or LED lighting from us - if you are interested, please simply ask.
