Technical details

País de la Fabricación	 Italia
fabricante	Luceplan
diseñador	Alberto Meda, Paolo Rizzatto
año	1985
protección	IP20
Volumen de suministro	Leuchtmittel/Bulb
material	aluminio, nylon
base/portalámparas	GY6.35
conmutabilidad	en cabezal de lámpara
Alimentación (máx. Watt)	10 Watt
longitud del brazo	80 + 30 cm
Dimensiones del soporte de la lámpara	15 cm
cabeza del alumbrado masa	10 cm
distribución de la luz	directamente

Descripción

The Luceplan Berenice Terra floor lamp is equipped with two mobile light arms, which can be freely rotated and swiveled. This lamp is offered in different surfaces and with different reflector colours. The reflectors in yellow, sage green, rose or satin white are made of glass, the reflectors in aluminum, brass and black are made of metal. The light is emitted mainly directly, depending on where the light arm is rotated. Only a small portion of the light is directed into the room for the variants with glass reflector through the reflector.

There is an on / off switch on the light head. Since the current is directed through the lighting rods to the light head, no cable in the lighting rods are seen. The light can be operated with halogen lamps or LEDs. The lamp was designed in 1985 by Alberto Meda & Paolo Rizzatto.
