Descripción

The Holtkötter Supernova DL LED ceiling lamp combines a powerful light output with unique optics. This lamp has a large, flat ring that fulfils a very special task. This is elegantly connected to the large, round ceiling canopy by a gentle curve, so that both elements are directly opposite each other and together create a harmonious image. The lamp can be dimmed continuously using an external trailing edge phase dimmer. When dimmed, the light colour of the integrated LEDs changes to a warmer tone (from 2,900 Kelvin warm white to 2,200 Kelvin warm white) thanks to dim-to-warm technology. The Holtkötter Supernova is available in the following surface textures: Aluminium matt, white, black/brass anodised and white/aluminium matt.
