### Description

The Vibia Halo Circular 2331 is an idea of the designer Martín Azúa who designed the lamp with two circular elements made of matt white PMMA. The two-lamp pendant lamp has modern LED technology. It is height determinable and can be hung up to 250 cm whereby the level of each individual lamp element and if to hang it horizontally or diagonally, can be decided separately.

Two efficient LEDs are included. These LEDs are dimmable electronic 1-10V. On request a DALI as well as a with Casambi module dimmable version is available. With a Casambi module, it is possible to operate the lamp via smartphone or tablet using the Casambi app via Bluetooth. Casambi technology also offers the option of switching the light on at specific times via a timer. The light output of the Halo Circular 2331 is gentle and is referred to by Vibia as "almost magical light".
