Description

The Origami 4504 by Vibia is a double wall-mount lamp designed by Ramón Esteve. This name of the lamp is chosen because it looks like this work of art which is created by folding paper. The lamp is not made of paper but of polycarbonate. The colours white, green, terra dark or brown are on offer.

The Origami 4504 can be used both for interior lighting as well for outdoor use because it has the protection class IP65 (spray water - and dustproof). As bulbs two modern LEDs with a power of 6.3 watts are integrated. The wall light can be dimmed on site with a trailing edge phase dimmer. The wall lamp is already convincing as a single lamp, but is even more effective in combination with other lamps of this series. To a wall terminal, a maximum of 30 Origami modules can be connected. For larger compositions ask us for a special connection system. If you need help configuring your very own Wall art combination, please contact us also.
