Dimensions	H 43,5 cm B 36 cm

Description

The Keilbach Glasnost iron letterbox is a delight with its front and flap made of corroded, weatherproof steel, combined with walls and floor made of brushed stainless steel. The front and the flap are already covered at the factory with an extraordinary patina of patina, which will develop individually at your home. Depending on the place of installation, each Glasnost iron letterbox will develop into an individual unique piece.

The designer Peter Keilbach attaches great importance to high-quality materials, careful workmanship and long life expectancy in his Glasnost mailbox series. This high-quality workmanship can be seen, for example, in the installation of 2 damping elements. The flap closes slowly and quietly. The stainless steel of the side walls is between 1.5 and 2 mm thick, the mailbox weighs 9 kg. The lock is protected under the flap, the letters are elevated inside on a double floor.

Matching the mailboxes, Keilbach offers tripods that carry the mailbox. These tripods are available as accessories. Also suitable newspaper boxes are offered. A foil inscription of your Glasnost mailbox, individual logos, displays or LED lighting are also available - please contact us if you are interested.
