Description

The five motifs of the Keilbach Picto 2 pictograms are lasered negatively (background visible) from a 2 mm thick stainless steel plate. The pictograms are simply attached with a mirror adhesive tape.

When using the Keilbach Picto 2 pictograms, confusion is impossible, because the symbols point the way to the toilet, to the wardrobe or even to the changing room without any words.

The design of the symbols is minimalist yet unmistakable. The design is a unique homage to the Bauhaus.

The following signs are available for selection:
