### Description

The Licht im Raum White Moons 2x2 wall lamp has four shades which can be oriented differently. In this way they can emit light in different directions and create an interesting game of light reflections. The lamp series already won several design awards and also includes other wall and pendant lamps. It was designed 2016 by Daniel Klages. This lamp is supplied with a polished stainless steel wall bracket. On request, the lamp is also available with a brass wall bracket.
