### Description

The Akari New Frame is a highly polished and nickel-coated table lamp. The rectangular shape of the Akari New Frame provides a clear look. The almost centrally located lamp is a beautiful contrast to the angular frame of the lamp. The lamp has an integrated dimmer on the textile supply line and is 33 cm high and 36 cm wide. The New Frame by the German manufacturer Akari has an E27 socket and is available with an LED or halogen bulb. The Akari New Frame is puristic and at the same time unusual - an eye-catcher in every room.
