

Serien Lighting

Poppy Spare Bimetallic Lamellae

Technical details

Pays de fabrication	 Allemagne
Fabricant	Serien Lighting
matériel	bimétallique
Dimensions	L 12 cm

Description

The Serien Lighting Poppy replacement bimetal lamellae can be used for all lamps from the Poppy family. This replacement part has the shape of a metal flower. After switching on the light, the metal flower opens due to the heat of the light bulb. The lamellae can be replaced without tools.
