Description

The Knapstein LINDA-112 pendant lamp has a length of 112 cm. By lifting or pulling the lamp, the total height of the lamp can be adjusted at any time between 73 cm and 180 cm. An inclined suspension of the lamp is also possible. The pendant lamp emits its light upwards and downwards at the same time. The uplight and the downlight can be switched and dimmed separately by gesture control. In addition, the light colour can be adjusted to a warmer tone (from colour temperature 3,000 Kelvin warm white to 2,200 Kelvin extra warm white). All dimming and light colour settings are saved via memory function and automatically reset the next time the light is switched on.

The sensor area for gesture control is located in the centre of the lamp. The lamp is switched on or off with a wiping hand movement in the sensor area. If the hand is held longer in the sensor area, the light intensity can be adjusted. By holding the hand in the sensor area again for a longer time, the desired light colour can also be set. LINDA-112 is available with a matt nickel, black or bronze effect surface. The series also includes pendant lamps with a length of 92 cm, 132 cm or 152 cm. On request, the LINDA is also available in other lengths or surfaces.
