### Description

The Licht im Raum Ocular Wall Lamp LED Series 100 Master emits light upwards and downwards. Downwards, the light is focused by a lens and emitted homogeneously. The Ocular lenses focus and control the light in a precise, glare-free manner, creating an outstanding quality of light. At the same time, the wall lamp also distributes light upwards. The lens has a diameter of 100 mm and can be swivelled.

The wall bracket of the Ocular Wall Lamp LED Series 100 Master is made of stainless steel or brass. The wall lamp is offered in the surfaces brushed stainless steel, hand-polished stainless steel, matt black, white, natural brass and black / gold. The two integrated LEDs are long-lasting, dimmable and particularly powerful.
