Description

With 2600 lumens and a colour rendering index of RA>90, the Holtkötter Supernova S leaves nothing to be desired in terms of the light emitted. The lamp head, which can be rotated and swivelled in all directions, allows the light to be individually directed. The light can be infinitely adjusted using the centrally mounted touch dimmer. The last light setting used is saved using the memory function. The height is adjusted using an integrated, invisible lift mechanism. The Holtkötter Supernova S is available in matt aluminium, anodised brass, platinum, white, bronze and black.
