Omschrijving

The Foscarini Big Bang LED is a sensational LED pendant lamp. Enrico Franzolini and Vicente Garcia Jimenez succeeded in keeping a very unique dynamics with the Big Bang Sospensione. The differently sized methacrylate plates overlapping each other seem randomly arranged as if an explosion took place before. This overlapping arrangement creates a diffuse and dazzle-free light distribution and it results in a pleasant atmosphere inside the room. The Foscarini Big Bang Sospensione has a mounting consisting of lacquered metal.

This pendant lamp is equipped with a LED light source and is offered as one DALI dimmable and one non-dimmable version. In addition, red or white colour is offered for the surface.
