Omschrijving

The Twitter bird house from Keilbach is a real bestseller. It was nominated for the German Design Award 2012 and nominated for the Focus Open Silver 2011 design award. It is available in six different versions, from simple natural colours to fresh spring colours such as yellow, orange, blue or pink.

The outer shell is made of 1.5 mm stainless steel or corroded steel and serves as rain protection. The interior is completely made of three-layer wood panels. A weatherproof, environmentally friendly paint was used for the lacquered versions. The steel cover does not rest directly on the wooden interior so that the air can circulate well between them.

Twitter can either be screwed to a pole, hung on a branch, attached to a tree trunk or attached to the house wall.

Dimensions: 17 × 17 × 17 cm, entrance hole diameter = 3,2 cm, 1,9 Kg
