

Vibia

Guise 2260

Technical details

Land van fabricage	 Spanje
fabrikant	Vibia
ontwerper	Stefan Diez
jaar	2018
bescherming	IP20
Omvang van de levering	LED
Diepte in cm	3
Diameter in cm	54
materiaal	aluminium, borosilicate
kabellengte	300 cm
dimmen	sensor dimmer
Wattage	10 W
LED	inclusief
Kleurweergave-index	>90
Lichtstroom in lm	445
Kleurtemperatuur in Kelvin	3.000 warm wit
Dimensions	Ø 54 cm

Omschrijving

With the Vibia Guise, Stefan Diez has discovered a new potential use for LED technology in contact with matter: The light emanates from the piece of glass, while the source remains invisible. With this approach Guise achieves a magical effect and at the same time is fully functional. Because of the transparency of the glass when switched off, the lamp almost disappears. When switched on, it expresses a luminous and almost magnetic presence.

The wall lamp version with a different formal expression features a glass disc that gives off a perimeter glow where the LED light source is also hidden. When turned off, it becomes fused with its background, when on, it evokes a solar eclipse. Vibia presents a wall lamp that integrates the LED light with the glass and making it pass through in such a way that it becomes invisible and then allowing it to appear out of nowhere. The Guise 2660 has a diameter of 54 cm.
