Omschrijving

From the frame structure of the Serien Lighting Reflex2 Ceiling M450, the light is directed onto a prismatic reflector surface inside the ceiling lamp. From there, the light shines absolutely glare-free into the room. The reflector is available in matt white, gold, silver or white. By selecting the colour of the reflector, the lamp creates a different lighting mood.

The Reflex2 Ceiling M450 ceiling light is operated with a powerful LED and has a colour temperature of 2700 Kelvin extra warm white. On request, it is also available with 3,000 Kelvin warm white or with Tunable White technology. The lamp with Tunable White technology can change the light from incandescent warm to cool white. On request, the ceiling lamp is also available DALI, 0-10 Volt dimmable or with Casambi module.
