### Omschrijving

The Serien Lighting Reflex2 Ceiling S300 ceiling lamp is 30 cm high and has a width and length of 20 cm. The lamp has a rounded frame structure in black. The lamp emits its light onto a prismatic reflector surface inside the ceiling lamp, from which it is radiated into the room. The reflector is available in matt white, gold, silver or white. Depending on the reflector surface, a different lighting mood is created.

The Reflex2 Ceiling S300 has the dim to warm function, which imitates the dimming behaviour of classic incandescent lamps that is perceived as pleasant when dimming. This means that when the light is dimmed down, it not only becomes darker but also changes its colour temperature from 2,200 Kelvin extra warm white to 3,000 Kelvin warm white. On request, the lamp is also available with 2,700 Kelvin extra warm white, 3,000 Kelvin warm white, DALI, 1-10 Volt or with Casambi module.
