Omschrijving

The Lupia Licht Saturn is a cylindrical LED ceiling light with an output of 9 watts and a reflector bowl that can be tilted by 350 degrees. The ceiling mount of the LED lamp has a diameter of 13 cm and is 6 cm high. The maximum projection of the Saturn ceiling light is 13 cm. This ceiling light has an inner reflector and allows a direct light radiation with a beam angle of 20 degrees. The light of the Saturn by Lupia Licht can be directed exactly where it is needed. The surfaces black, aluminium, white-black and white are available. Except for the white version, all lamps offered have a black inner reflector. The white version has a white inner reflector. The Saturn is available with a colour temperature of 2700 extra warm white or 3000 Kelvin warm white. The LED ceiling light comes from the manufacturer Lupia Licht in Germany and is dimmable via a trailing edge phase dimmer.
