

Lichtlauf

Justin White

Technical details

Land van fabricage	 Duitsland
fabrikant	Lichtlauf
ontwerper	Christoph Matthias
jaar	2016
bescherming	IP20
Omvang van de levering	LED
materiaal	aluminium
oppervlak	Gepolijst aluminium
kabel kleur	transparant
kabellengte	200 cm
LED	inclusief
Schaduw diameter	5 cm
prestaties van het systeem	3 x 1 Watt

Omschrijving

The Justin White by the German manufacturer Lichtlauf is a lamp that can create a play of colours. Three aluminium spheres emit white light of different colour temperatures: cool white, neutral white and warm white. Combined, they produce a clear white light. When this light falls on an object, shadows of different nuances are created - an unexpected moment. Three precisely adjustable polished aluminium spheres rest on rubber rings, so the shadows created can be aligned very precisely and create atmospheric effects. The diameter of each polished aluminium ball of the Justin White by Lichtlauf is 5 cm. The transparent cable, which serves as a supply line, is 200 cm long. This LED lamp has an on/off switch on the distribution box. Use the enclosed rubber rings to place the balls on it and align them as desired. This will prevent the spheres from rolling away and ensure that they maintain their alignment. Plug the included power supply into a wall socket. To switch on and off, press the switch on the distribution box. Place an object between the spheres and the irradiated surface and let yourself be surprised by the colour shadows.
