Omschrijving

The Bover Nans M/21/R can be operated wirelessly with its rechargeable battery. It is charged via a USB cable that is included in the delivery. Depending on the brightness setting, the battery lasts between twelve and thirty hours. On top of the lamp is integrated a push button dimmer, which can be used to switch the battery lamp and dim it to three brightness levels.

The Nans M/21/R is 20.4 cm high and has a diameter of 16.7 cm. With its practical handle, it can be taken anywhere. This lamp is with the protection class IP20 only suitable for indoor use, from the series Nans also battery lamps for outdoor use with a protection class IP65 are offered.

The lamp shade of the Bover battery lamp is made of a hand-woven, synthetic polyethylene fibre. It is available in the colours red, brown and beige. The upper part of the lamp including the handle is always in graphite brown. The Nans M/21/R is operated with an integrated LED that has a colour temperature of 2,700 Kelvin extra warm white. The light is emitted sideways and downwards, creating light reflections around the lamp.
