### Opis

The Vibia Cosmos 2515 is a four-light pendant lamp which is reminiscent of a constellation of various moons. The designers Lievore, Altherr and Molina created it. Four round, disc-shaped lamp shades made of polycarbonate in different sizes and colours form the lamp.

The two smaller lamp shades measuring 19 cm in diameter and are dark brown matt, the two larger lamp shades are 27 cm in diameter. One of the two larger lamp shades is light grey matt, the other bright matt green. The four lamp shades can be suspended until a maximum of 200 cm. Four modern 4.5 Watt LEDs are included. The light can be dimmed on site by an external dimmer (with DALI, push or 1-10 Volt). On request, there is also offered a with Casambi module dimmable version. The lamp with Casambi module can be operated via smartphone or tablet using the Casambi app via Bluetooth. Casambi technology also offers the option of switching the light on at specific times via a timer.
