Opis

The Vibia Origami 4508 was named after the famous Japanese art of paper. The lamp, however, is not made of paper but of polycarbonate and ABS. It is available in the colours white, terra dark, green or brown. The design was created by Ramón Esteve. Even as a single lamp is the Origami 4508 a real eye-catcher, but particularly in combination with several lamps of the same series, which can be combined, a work of art is created on the wall. It is a wall light and can be used for indoor lighting, but also ideal for outdoor use with the protection class IP65 (spray water- and dustproof).

As lamps four modern LEDs are included with each 6.3 watts. They can be dimmed on site with a trailing edge phase dimmer. To a wall terminal, you can connect a maximum of 30 Origami modules. For larger compositions ask us for a special connection system. If you need help in configuring your personal combination, please contact us also.
