

Vibia

Guise 2260

Technical details

Kraj produkcji	 Hiszpania
producent	Vibia
projektant	Stefan Diez
rok	2018
ochrona	IP20
zakres dostawy	LED
Głębokość w cm	3
Średnica w cm	54
tworzywo	aluminium, borokrzemian
długość kabla	300 cm
ściemnianie	Czujnik ściemniacza
Moc w watach	10 W
LED	Łącznie
Wskaźnik oddawania barw	>90
Strumień świetlny w lm	445
Temperatura barwowa w stopniach Kelvina	3.000 biała ciepła
Dimensions	Ø 54 cm

Opis

With the Vibia Guise, Stefan Diez has discovered a new potential use for LED technology in contact with matter: The light emanates from the piece of glass, while the source remains invisible. With this approach Guise achieves a magical effect and at the same time is fully functional. Because of the transparency of the glass when switched off, the lamp almost disappears. When switched on, it expresses a luminous and almost magnetic presence.

The wall lamp version with a different formal expression features a glass disc that gives off a perimeter glow where the LED light source is also hidden. When turned off, it becomes fused with its background, when on, it evokes a solar eclipse. Vibia presents a wall lamp that integrates the LED light with the glass and making it pass through in such a way that it becomes invisible and then allowing it to appear out of nowhere. The Guise 2660 has a diameter of 54 cm.
