Opis

The Vibia Palma 3702 is a horizontal wall lamp. The classic spherical shape achieves a completely new horizontality here, which is complemented by the integration of plants. The diffuser is made of mouth-blown glass and emits glare-free ambient light. The lamp rod mounted horizontally on the wall is made of aluminum, the plant pot of polymethylmethacrylate. The wall lamp is available in graphite-grey and white surfaces. Both surfaces are matt lacquered. The lamp is supplied as standard with a colour temperature of 2.700 Kelvin extra warm white, on request it is also available with a colour temperature of 3.000 Kelvin warm white or 4.000 Kelvin white. The wall light can be dimmed on site and is also available as a DALI dimmable version on request.
