Opis

The Knapstein TILDA-S LED floor lamp is equipped with a sensor dimmer that can be used to switch the lamp, dim it continuously and change the light colour. The sensor is located on the underside of the light head. Simply swipe the sensor to switch the lamp on or off. The light colour can be adjusted to a warmer tone (from a colour temperature of 3,500 Kelvin warm white to 2,200 Kelvin extra warm white). All dimming and light colour settings are saved using the memory function and automatically reset the next time the light is switched on. The Knapstein TILDA-S is available in different surfaces.
